# MARINE SECURITY

*Onshore and Offshore*

## Development, maintenance, management and implementation of Marine Facility Security Plans (MFSP's) and onshore and offshore regulatory compliance under the Transport Canada Marine Transportation Security Regulations (MTSR's).

Lions Gate's marine security services focus on supporting clients by either leading or assisting them with their marine security compliance requirements, and also enhanced security performance. Our specialists collaborate with you to assess your projects security needs.

Our Marine Security Consultancy Group includes qualified Marine Facility Security Officers (MFSO's) with the necessary security clearances (MTSC) who are fully conversant with the International Maritime Organization, International Ship & Port Facility Security and Transport Canada requirements. This ensures that a scalable security program is designed, to protect your land based and/or water-side operations, people and infrastructure.

Lions Gate's extensive networks, resources and relationships with Port Authorities and government agencies provide a one-stop shop solution for clients looking for comprehensive marine security solutions. Upon request, we can provide Lions Gate security specialists to manage your Marine Facility Security Plan as part of your operational team.

- International Ship & Port Facility Security (ISPS) Code Compliance
- Marine Transportation Security Regulations (MTSR's) Compliance
- Marine Facility Security Plan (MFSP) development for water and land-based operations
- MFSP Strategic Decision Support (Information and Intelligence)
- MFSP implementation and maintenance, including event security planning and the provision of security resources as required i.e. uniformed site security, patrol or K9
- MFSP audits for water and land-based operations
- Designing and delivering MFSP awareness and vigilance campaigns, and training / orientation programs
- Ensuring effective incident recording & reporting
- Ensuring effective communication & cooperation between marine facility and interfacing vessels
- Ensuring security equipment operation, testing, calibration, & maintenance is in accordance with MFSP
- Conducting security drills & exercises within a developed and approved crisis and emergency response plan

Security Management Programs Spotlight: Take an in-depth look at the pitfalls and planning for Canadian marine facility operators: <https://www.lgrmg.ca/a-canadian-marine-facility-operators-security-navigation-chart-white-paper/>.
